

Weather intelligence

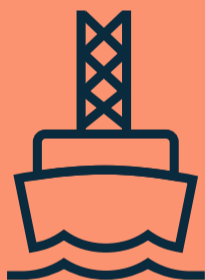

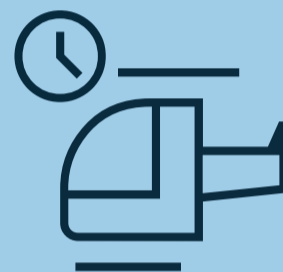

Helideck monitoring for offshore helicopter operations

Improving helideck operations protects these crucial functions:

Crew and supplies

Avoid delays and safety risks by knowing the right time to land or take off.

Construction

Transport equipment without expensive weather-induced delays.

Maintenance

Keep crew safe and assets secure when dangerous weather approaches.

Vaisala Helideck Monitoring System

CAP 437-compliant weather data accessible in real-time from any device.

Developed by aviation industry experts with these critical ops in mind.
